

AUTOMATION SOLUTIONS FOR PLASMA APPLICATIONS

<https://www.ulbrich-group.com/automation-solutions-for-plasma-applications>

ULBRICH Automation combines technical knowledge, automation technology and a lot of experience in the chemical industry.

We offer complete solutions for plasma applications supporting production processes, eg. improvement of adhesion for bonding & sealing, surface cleaning & removal of oxidation.

ULBRICH Automation combines innovative plasma technology with robotic handling, adhesive dispensing, UV curing technology – either as a stand-alone cell or integrated into serial production.
