

## CMO Clear Mechanical Oil

CMO has outstanding penetration characteristics, longevity and lubrication efficiency. It contains a clear colloidal suspension of molybdenum disulphide which enables it to be used even after the base oil has evaporated, continually providing exceptional anti-wear properties.

- Excellent mechanical lubricant that works at both high temperatures and extremes of pressure
- Protects against rust by providing a barrier against condensation and oxidation
- · Highly tenacious film which will not drain away when moving parts come to rest
- · Highly resistant to water washing, steam cleaning and ensures long term protective film
