

## Three Bond 2271G (One-component Epoxy Resins / NCP)

The product Three Bond 2271G is an one-component epoxy resin, which has been specially developed to provide Non Conductive Paste for Flip Chip bonding process.

### 1. Features

- Fast cure (for example 190°C x 5 sec)
- Low viscosity for easy dispensing (15 Pa·s)
- Low coefficient of thermal expansion

### 2. Typical properties

Test Item	Result	Unit
Colour	Light yellow	
Viscosity at 25°C	15	Pa·s
Density at 25°C	1.25	g/cm <sup>3</sup>
Curing time at 190°C	5	sec
DSC Analysis		
Reactive beginning temperature	70	°C
Reactive peak temperature	115	°C
Reactive end temperature	170	°C
Peak area	240	J/g
TMA Analysis		
Glass transition temperature	103	°C
Coefficient of thermal expansion: $\alpha_1$	$52 \times 10^{-6}$	°C <sup>-1</sup>
Coefficient of thermal expansion: $\alpha_2$	$155 \times 10^{-6}$	°C <sup>-1</sup>
DMA Analysis		
Glass transition temperature	100	°C
Young's modulus	4.3	GPa
Shear strength G-EP/G-EP	24	MPa
Volume resistivity	$2 \times 10^{14}$	$\Omega \cdot m$
Dielectric constant at 1 kHz	3.4	
Dielectric constant at 1 MHz	3.4	
Dielectric dissipation factor at 1 kHz	0.004	
Dielectric dissipation factor at 1 MHz	0.004	
Shelf life at 5°C	6	months

### 3. Handling

- Keep the epoxy resins tightly closed in the original container and store them in a dark, dry, sufficiently ventilated and cool place.
- Before opening the container let the products reach room temperature as otherwise the formation of dew would be resulting.
- In order to obtain optimal results remove humidity, fat and other impurities from the fitting surfaces.
- According to the nature of the joints (width, surface roughness, unevennesses) apply an appropriate quantity of epoxy resins uniformly on one of the fitting surfaces and join the parts immediately, position them correctly and fix them.
- The degree of curing varies depending on the thickness of the coating, the ambient temperature and the duration of the process.
- When using precision resins, changes in viscosity versus the ambient temperature are to be verified.
- Products once transferred into another container should not be returned to the original container. Excess sealant can be easily wiped off with a cloth.

### 4. Packing

5 x 10 cc Syringes (4g)

All data given here were compiled to the best of our knowledge and are based on experiments and tests of our Company. We cannot guarantee the results obtained through the use of our products, and all products are sold and samples given without any warranty, expressed or implied, of fitness for any particular purpose or otherwise and upon condition that the user shall make his own tests to determine the suitability of the product for his purpose.
