

## KRYTOX GPL 200

<https://www.ulbrich-group.com/krytox-gpl-200>

**Krytox® GPL200 grease** is PTFE thickened, contains no additives and can be used on components that come in contact with chemicals. Typical applications include valves, instruments or bearings in contact with chemicals including alcohols, ammonia, solvents, steam, acids and bases, and oxygen systems including LOX and GOX. They are commonly used as seal and o-ring lubricants and are compatible with all types of seals.

*Base Oil:* PFPE(pnd)  
*Gellant:* PTFE  
*Viscosity at 40 °C [mm<sup>2</sup>/s]:* 4  
*Viscosity index (VI):* -  
*Temperature range[°C]:* -70 to 66  
*Appearance:* White
